

REPORT OF YOUTH SENSITISATION THROUGH SOCIAL ACTION

Understanding Social Issues and the Role of an NGO in Responding to Them

Submitted To:

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of **B.Tech CSE**

By

Name of Student: SAMRIDDHI SAXENA

Roll Number of Student: 25SCS1003001319

Batch: 2025-29

Internship Organisation: Relief Mission Foundation

Mode of Internship: VIRTUAL

Internship Period: 01 AUG 2026 – 1 SEP 2026

CANDIDATE'S DECLARATION

I, SAMRIDDHI SAXENA, do hereby declare that the internship report titled **“Graphic Designer Intern at Relief Mission Foundation”** has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. The report is based on my learning, design projects, and remote participation during my virtual internship as a Graphic Designer at Relief Mission Foundation from 01 Aug 2026 to 1 Sep 2026. All supporting documents supplied for the internship have been appropriately incorporated as annexures.

I further declare that the observations, learning outcomes, and descriptions of my role in this report represent the genuine internship work and creative contributions documented for the project. I have not represented physical field visits or direct community measurements where such activities were not part of the virtual graphic design internship. All references and supplied organizational documents used in preparing this report have been acknowledged.

I affirm that this report has not been submitted to any other institute for any degree or diploma requirement, and I shall be solely responsible for any copyright violation arising from material used in this report.

Student Name: SAMRIDDHI SAXENA

Roll No.: 25SCS1003001319

ACKNOWLEDGEMENT

I sincerely thank Relief Mission Foundation for providing me with the opportunity to undertake a 30-day virtual internship under its Graphic Design Internship program. The internship gave me an invaluable platform to analyze pressing social issues, develop creative visual concepts based on campaign objectives, address target audiences effectively, and communicate meaningful social messages through structured design thinking. Working hands-on with typography, grid layouts, color palettes, vector graphics, and photo-based compositions was an enriching creative experience.

I am deeply grateful to the organisation's Founder and Secretary, Seema Yadav, as well as the design and campaign management team at Relief Mission Foundation for their constant guidance, constructive feedback, and encouragement throughout my tenure. The virtual nature of the internship demanded disciplined project execution, clear digital communication, and prompt delivery of design assets, proving how digital visual communication can drive impactful social sensitisation remotely.

I would also like to express my sincere gratitude to the faculty and internship coordinators at the School of Computer Science and Engineering, IILM University, Greater Noida, for facilitating this opportunity to broaden my creative and technical horizons beyond the core engineering curriculum. I extend my heartiest thanks to my parents for their continuous support and encouragement throughout this internship and the compilation of this report.

Finally, I am thankful for this reflective experience. It has reinforced the essential role of visual empathy, social responsibility, structured design strategy, and technology-assisted problem-solving in addressing human-centric challenges.

4. PROJECT DESCRIPTION

4.1 Introduction

As an undergraduate Computer Science student at IILM University, my 1-month virtual internship as a Graphic Designer at Relief Mission Foundation provided a unique vantage point to explore how visual arts, UI/UX design principles, and digital communication technology intersect with non-profit social action. The primary objective of this initiative was to sensitise young professionals to grassroots social issues while leveraging modern digital design tools to bridge the communication gap between non-governmental organisations (NGOs) and the public.

Rather than approaching social work solely through administrative or field operations, this project recognized visual media as a primary driver of awareness, empathy, and social change. In a digital-first world, complex societal problems—such as educational inequities, child welfare, healthcare access, and environmental degradation—need to be translated into clear, compelling, and audience-focused visual narratives.

Because the internship was conducted in a completely virtual format, my work focused on creative conceptualization, digital asset creation, brand identity management, and social media campaign strategy. Applying systematic visual engineering to social messaging allowed me to translate technical design concepts—such as hierarchy, layout theory, visual balance, and color psychology—into tools for human welfare and advocacy.

4.2 Organization Profile

Relief Mission Foundation (RMF) is a registered non-governmental organisation dedicated to holistic community welfare, education, public health, animal care, and environmental sustainability. Relief Mission Foundation operates from its registered office at C/o Manoj Aggarwal, Behind Shekhawat Nursing Home, Ward No. 15, Mohalla Bacchadi, Kotputli, Jaipur, Rajasthan, India - 303108.

According to the official internship communication, Relief Mission Foundation inducted me into its 1-month Youth Sensitising Initiative as a Graphic Designer Intern from 01 Aug 2026 through 01 Sep 2026. The engagement was explicitly designated as a remote, virtual learning internship designed to build professional digital outreach capabilities for non-profit social causes.

Throughout this month, Relief Mission Foundation served as a dynamic operational model showing how modern non-profits utilize social media platforms (such as LinkedIn, Instagram, and Facebook) to drive fundraising appeals, advocate for policy changes, and mobilize community volunteers.

4.3 Problem Statement

While non-profit organisations address critical ground-level realities, they often face a major communication hurdle: complex social issues, statistics, and human stories are frequently presented through dense text or unorganized visual materials. This leads to low engagement among digital-native audiences, particularly youth who consume information through visual-first platforms like Instagram and LinkedIn.

The central problem addressed during this internship was how to transform dense socio-economic messaging into intuitive, meaningful, visually striking, and audience-centric creative assets without losing the emotional integrity or urgency of the core message.

Furthermore, maintaining brand consistency across varied social campaigns presents an operational challenge for NGOs. Misaligned typography, inconsistent color usage, and poor visual hierarchy can reduce the trust and credibility of digital outreach campaigns. The challenge was to systematically research target demographic behaviors, define a structured visual identity, and engineer media content—such as Instagram posts, stories, reels, banners, and digital flyers—that converts passive scrollers into active advocates.

4.4 Project Objectives

- To bridge technical computer science knowledge with creative visual communication for social causes.
- To design audience-focused, meaningful, and aesthetically compelling visual assets for digital and social media campaigns.
- To master and apply graphic design and video editing software (Canva, Adobe Photoshop, Figma, and CapCut) in a professional workflow.
- To establish visual hierarchy, typography systems, color schemes, and structured layouts tailored to diverse social awareness drives.
- To create multi-format social media content including Instagram posts, stories, reel covers/videos, LinkedIn graphics, and campaign banners.
- To maintain and enforce the NGO's official brand identity across all external communication materials.

- To develop self-management, remote execution, and structured feedback strategies within a virtual internship setup.

4.5 Scope of the Project

The scope of the project spanned creative production, digital strategy, and non-profit brand communication. The core thematic awareness campaigns for which visual assets were engineered include:

1. **Child Welfare & Educational Inclusion:** Designing awareness posts and donation flyers focused on bridging educational access gaps for underprivileged children.
2. **Women Empowerment & Skill Building:** Creating visual narratives highlighting vocational training, self-reliance, and economic inclusion for women.
3. **Community Healthcare & Vaccination Drives:** Structuring clean, easily readable infographics and banners on health awareness, hygiene, and medical relief drives.
4. **Animal Welfare & Environmental Care:** Conceptualizing engaging stories and posts advocating for street animal rescue, adoption, and urban greening drives.
5. **Event Promotions & Volunteer Mobilization:** Designing digital posters and flyers to recruit youth volunteers and promote NGO events.

All deliverables were prepared virtually, leveraging modern creative suites to produce ready-to-publish assets optimized for mobile and desktop screens.

4.6 Technologies and Tools Used

Executing graphic design and media editing tasks remotely required an industry-standard creative software stack:

- **Canva:** Utilized for rapid layout prototyping, social media post framing, flyer drafting, and template management.
- **Adobe Photoshop:** Applied for high-precision image editing, background removal, photo restoration, color grading, multi-layer photo manipulations, and visual composition.
- **Figma:** Leveraged for vector icon creation, layout grids, visual component consistency, UI-style graphic structuring, and brand kit alignment.
- **CapCut:** Employed for video editing, motion graphics, automated captions, audio synchronization, and visual transition effects for Instagram Reels and short video campaigns.

- **Collaboration & Documentation Tools:** Google Drive, Zoom, and WhatsApp/Email for asset sharing, team feedback sessions, and project tracking.

4.7 Project Workflow / System Architecture

The creative lifecycle for converting a campaign concept into a published social media asset followed a structured **Graphic Design & Social Media Workflow**:

[Campaign Brief / Social Cause Identification] → [Audience & Visual Research]

[Final Publishing / Archiving] ← [Review & Feedback Iteration] ← [Design & Production]

1. **Brief Acquisition:** Receiving thematic requirements, text content, and campaign goals from the NGO management.
2. **Visual Strategy & Research:** Studying target audience psychology, analyzing trending visual formats, and selecting relevant color palettes (e.g., warm, empathetic tones for human stories; clean blues/greens for healthcare and environment).
3. **Drafting & Layout Assembly:** Wireframing layouts in Figma or Canva and preparing imagery in Adobe Photoshop.
4. **Multimedia Production:** Editing video reels and motion graphics in CapCut with appropriate text overlays and background scores.
5. **Quality Check & Feedback:** Presenting draft creatives to the supervisor, refining typography alignment, and ensuring brand guideline compliance.
6. **Export & Delivery:** Rendering assets in platform-specific formats (1080x1080 px for posts, 1080x1920 px for stories/reels) for immediate social deployment.

4.8 Methodology

The methodology adopted throughout the 1-month internship combined visual design theory with iterative content engineering across seven key stages:

- **Phase 1: Brand Guidelines Study:** Reviewing Relief Mission Foundation's official logo, brand colors, font pairings, and messaging guidelines.
- **Phase 2: Target Audience Analysis:** Identifying visual preferences across age groups—emphasizing punchy, dynamic graphics for youth on Instagram and clean, professional visuals for LinkedIn.

- **Phase 3: Moodboarding & Typography Selection:** Creating visual moodboards and choosing legible sans-serif and serif typefaces to balance emotional appeal with clear readability.
- **Phase 4: Photo & Vector Processing:** Sourcing, retouching, and compositing real project photos and vector elements using Adobe Photoshop and Figma.
- **Phase 5: Short-Form Video Creation:** Assembling raw footage and imagery into 15–30 second engaging Instagram Reels using CapCut.
- **Phase 6: Quality Assurance & Iteration:** Reviewing text contrast, margins, safe zones for social media UI overlays, and overall visual balance.
- **Phase 7: Impact Assessment & Portfolio Documentation:** Archiving published graphics and evaluating social engagement metrics (likes, shares, comments) to refine future design choices.

4.9 Virtual Internship Implementation

As established in the official offer letter, the internship was conducted entirely online. Managing a remote graphic design role required high personal accountability and streamlined digital workflows:

- **Structured File Systems:** Organizing cloud folders by campaign name, design tool used, and file format (.PSD, .FIG, .PNG, .MP4) to ensure seamless handovers.
- **Digital Communication:** Maintaining continuous contact with coordinators via email and messaging apps to review design revisions in real time.
- **Remote Problem-Solving:** Overcoming challenges such as low-resolution source images by applying upscale filters, vector tracing, and masking techniques in Adobe Photoshop.
- **Deadline Management:** Setting daily production schedules to deliver static posts, animated stories, and video reels according to the NGO's posting calendar.

4.10 Activities and Work Performed Virtually

During the 30-day internship, my core deliverables and creative responsibilities included:

1. **Instagram & Facebook Post Design:** Created grid posts focusing on child education, festival celebrations with underprivileged communities, and healthcare awareness campaigns.

2. **Instagram Stories & Interactive Creatives:** Designed high-converting vertical graphics (1080x1920 px) incorporating poll prompts, quiz layouts, and swipe-up call-to-actions to boost user interaction.
3. **Instagram Reels & Short Video Editing:** Edited engaging short video reels on CapCut using transition effects, background music, and text captions to showcase NGO field drives and volunteer activities.
4. **Digital Banners & Campaign Headers:** Formulated wide-format banners for LinkedIn, Facebook cover pages, and event landing pages.
5. **Fundraising & Event Flyers:** Designed visual appeal posters for donation drives, emergency relief campaigns, and volunteer recruitment programs.
6. **Brand Asset Management:** Maintained visual consistency by applying standardized logo placements, primary color palettes, and typographic hierarchies across all creative files.

4.11 Areas of Social Issues Covered

4.11.1 Child Welfare & Educational Inclusion

Designed compelling visuals depicting underprivileged children accessing formal education. Emphasized hopeful, bright colors to inspire public support for book donation and classroom sponsorship drives.

4.11.2 Women Empowerment & Skill Development

Engineered graphics illustrating vocational training, sewing centers, and self-help initiatives for women. The visuals highlighted economic independence, dignity, and personal growth.

4.11.3 Public Healthcare & Sanitation Drives

Developed clean, information-driven infographics highlighting free medical camps, vaccination drives, and preventive hygiene practices. Focused heavily on visual clarity and instant readability.

4.11.4 Animal Rescue & Welfare

Created empathetic awareness campaigns for street animal medical care, rescue stories, and adoption drives, using emotionally resonant imagery to foster community compassion.

4.11.5 Environmental Sustainability & Green Initiatives

Designed campaigns around urban tree planting, recycling schemes, and clean-up drives, utilizing natural color palettes and vector icons to encourage eco-friendly habits.

4.12 My Role as an Intern

As the Graphic Designer Intern, my role centered on translating social impact concepts into visual communication assets. My specific responsibilities encompassed:

- **Social Media Creatives:** Designing custom graphics for Instagram, Facebook, and LinkedIn platforms.
- **Campaign Branding:** Conceptualizing end-to-end visual themes for specific awareness weeks and fundraising drives.
- **Video Production:** Editing raw footage into engaging short-form video reels for Instagram using CapCut.
- **Visual Identity Enforcement:** Ensuring that all published materials strictly followed the NGO's official branding guidelines, including color schemes, logo placements, and font selections.
- **Audience-Centric Design:** Adapting layouts, font sizes, and visual contrast to ensure maximum accessibility and engagement across mobile screens.

4.13 Expected Outcomes

- A complete portfolio of published digital creatives for social causes across multiple formats.
- Mastery of professional multi-tool design workflows integrating Canva, Adobe Photoshop, Figma, and CapCut.
- Enhanced ability to convey complex social realities through empathetic and visually engaging art direction.
- In-depth understanding of digital campaign metrics and audience engagement strategies in the non-profit sector.
- Demonstration of strong self-discipline, time management, and asynchronous collaboration in a virtual work environment.

4.14 Learning Outcomes

This 1-month design internship delivered key technical and practical learning points:

1. **The Power of Visual Storytelling:** I learned that a well-crafted visual can communicate urgency, hope, and social responsibility far more effectively than long text blocks.
2. **Tool-Specific Mastery & Interoperability:** I developed a seamless workflow—using Figma for layout grids, Photoshop for raster manipulation, Canva for rapid templating, and CapCut for short-form video motion work.
3. **Design Hierarchy & Visual Psychology:** I mastered contrast, color theory, and typographic hierarchy to guide a viewer's eye directly to key information and Call-to-Action (CTA) buttons.
4. **Brand Consistency in Non-Profits:** I realized that visual consistency directly builds organizational trust, credibility, and brand recognition among potential donors and volunteers.
5. **Technical Engineering Applied to Art:** As a Computer Science student, structuring design assets using modular components, grids, and reusable Figma components mirrored software engineering principles like modularity and code reuse.

4.15 Challenges and Observations

- **Low-Quality Source Media:** Received ground photos from field teams were occasionally low-resolution or poorly lit. I addressed this by applying sharpening, noise reduction, and color correction in Adobe Photoshop.
- **Balancing Emotion with Information:** Finding the right balance between emotional visual storytelling and clear factual information required multiple design iterations.
- **Mobile-First Optimization:** Ensuring that small text elements remained completely legible on smaller smartphone screens required strict adherence to high-contrast color choices and generous font sizing.
- **Managing Feedback Loops:** Working asynchronously in a virtual environment sometimes delayed feedback; I resolved this by submitting design variations upfront for faster approval.

4.16 Recommendations

1. **Establish a Central Digital Asset Management System:** Non-profits should implement cloud-based digital asset libraries with organized brand kits, icon sets, and editable templates to accelerate content creation.
2. **Standardized Media Capture Guidelines for Field Staff:** Providing basic photo/video framing guidelines to field volunteers would significantly improve the quality of input media for design teams.
3. **Interactive Design Modules:** Incorporating interactive elements—such as animated infographics, motion graphics, and clickable PDF brochures—can further increase audience engagement on platforms like LinkedIn and web portals.

4.17 Conclusion

My 1-month virtual internship with Relief Mission Foundation as a Graphic Designer Intern was a deeply rewarding experience. It successfully bridged my technical computer science background with creative visual communication, demonstrating how technology and art can combine to serve societal needs.

Through designing audience-focused social media graphics, Instagram stories, reels, banners, and campaign flyers using Canva, Photoshop, Figma, and CapCut, I gained practical skills in digital marketing and visual design strategy. More importantly, the experience cultivated a strong sense of social responsibility, showing how impactful visual design can give a voice to grassroots social issues, mobilize community action, and support meaningful human welfare initiatives.

4.18 Certificates and Communication Proof

In compliance with IILM University guidelines, official internship communication records, including the Internship Offer Letter (dated 10 Aug 2026) and the official Internship Completion Certificate issued by Relief Mission Foundation (confirming tenure from 01 Aug 2026 to 01 Sep 2026), have been verified and attached in Annexures A and B respectively.
